Zhiron Wu

(857) 300-3514 | Cambridge, MA | : zwuy@mit.edu | in: linkedin.com/in/zhironwu

Education

Massachusetts Institute of Technology Sep. 2022 - May 2026
Candidate of Master of Engineering (MEng) *GPA: 4.7/5.0*

- Bachelor of Science in Computer Science and Engineering + Japanese Minor
- **Relevant Coursework:** Secure Hardware Design, Applied Cryptography, Intro to Machine Learning, Computer Vision, Deep Learning, Algorithms, Computer Systems Engineering, Computation Structures, Software Construction

Skills

- **Languages:** Python, C/C++, TypeScript, JavaScript, Rust, HTML/CSS
- **Frameworks & Libraries:** React, PyTorch, NumPy
- **Tools & Platforms:** Git, GitHub Actions, Jupyter, Linux
- **Practices:** Code Review, Debugging, Testing, Data Structures & Algorithms, Technical Documentation
- **Spoken Languages:** Spanish - Native, English - Fluent, Japanese - Intermediate

Experience

Fundamentals of Programming MIT EECS Department
Teaching Assistant *Sept. 2026 - Present*

- Guide students through foundational Python and software engineering concepts, including algorithmic problem solving, data structures, and recursion.
- Review student code and provide feedback on correctness, style, and efficiency, reinforcing good software engineering practices.

SECOM - Intelligent Systems Laboratory Tokyo, Japan
Software Engineering Intern, Systems Architecture Group *Jun. 2026 - Aug. 2026*

- Explore secure delivery and execution methods for machine learning models using Microsoft's VBS Enclaves, a software-based Trusted Execution Environment (TEE), to protect model integrity and confidentiality.

Fundamentals of Programming MIT EECS Department
Lab Assistant *Sept. 2023 - May 2026*

WEBSTAFF Tokyo, Japan
Software Engineering Intern *Jun. 2025 - Aug. 2025*

- Developed and enhanced software tools for internal and external use, contributing to the successful deployment on production websites.

Computing Research Center at National Polytechnic Institute Mexico City, Mexico
Research Intern *Jun. 2024 - Aug. 2024*

- Benchmarked the performance of post-quantum cryptography implementations on a resource-constrained ARM device, writing and profiling embedded C code.

Introduction to Python MIT EECS Department
Lab Assistant *Feb. 2023 - May 2023*

- Introduced students to introductory Python and programming concepts and helped them with their assignments, including debugging, refactoring, and testing.

Low-Level Programming in C and Assembly MIT EECS Department
Lab Assistant *Feb. 2023 - May 2023*

- Assisted in the teaching process for a course on low-level programming in C and Assembly, focusing on memory and associated topics including pointers, and how different data structures are stored in memory, the stack, and the heap.
